DeviceGuards for Electrical Components

Made in the USA

Our Products Now Meet:

- **UL STANDARD 514C**
(DIELECTRIC STRENGTH & FLAMMABILITY)
- **CERTIFIED ASTM STANDARD D1790 & D638**
(IMPACT & TENSILE STRENGTH)

SAFETY COVERS for BREAKER BOXES and PANELS satisfy OSHA requirements and meet related ANSI codes.

Clear Temporary Safety Covers for Breaker Boxes and Panels are the best choice for effective holding power and easy view of panel breakers, conduit status and over-all viewing of panel condition. Made from strong durable PVC, these covers are not only puncture resistant but have great dielectric and flame retardant values as well.

- Clear PVC allows covers to stay in place for easy viewing of panel condition
- Strong dielectric properties keep workers safe
- Self extinguishing fire resistant PVC material used
- 14" and 20" kits available – adjustable to all sizes of openings
- Strong holding power – covers stay in place and won't fall off
- Economical pricing – recyclable
- OSHA approved – meets related ANSI code requirements
- Convenient low volt covers available
- Recyclable and made in the USA

Recently used at Spokane Falls Community College (53 panel covers), the Electrical Contractor gave their highest recommendation for this product.
