

Clear Industries, LLC.— Home of SmartGuard Covers

## SmartGuard Access Covers

Our protective device covers are designed specifically for the electrical industry. These covers are carefully designed and precision drilled to perfectly fit your applications. SmartGuard offers two primary mounting methods for our Prefab Covers; Pre-installed screws, and Pre-installed Pins. These access covers are designed to protect the perimeter of the device during construction while allowing electrical access to the device for use.

Fits the following device types:

- Duplex Outlets, Decora/GFCI Outlets
- Toggle Light Switches

Included Hardware Options

- Pre-Installed with Screws
- Pre-Installed with Pins

Material Specs

- Made from Yellow, Translucent PVC Rigid Film
- 25 mil Sheet Thickness

Fire-Related Information

- NIOSH Approved SCBA Required if this PVC were to burn
