

Clear Industries, LLC.— Home of SmartGuard Covers

SmartGuard Prefab Device Covers

Our protective device covers are designed specifically for the electrical industry. These covers are carefully designed and precision drilled to perfectly fit your applications. These covers are used for preventing dirt, dust, mud, and debris out of your devices during construction and renovation. SmartGuard offers two primary mounting methods for our Prefab Covers; Pre-installed screws, and Pre-installed Pins. We also offer a blank variant for the user to provide their own hardware if they wish. Our Prefab Covers are typically available in 1Gang to 4Gang.

Available for the following device types:

- Duplex Receptacles
- GFCI/Decora Receptacles
- Toggle Switches
- 20Amp/250V Single Receptacles
- Dryer/Range Outlets + Similar

Included Hardware Options

- Pre-Installed with Screws
- Pre-Installed with Pins
- No Installation Hardware Included
