SMARTGUARD™

PRE-FAB DEVICE COVERS

SmartGuard's sturdy electrical prefab products offer steel-like performance while saving 50—75% in material cost compared to metal alternatives. Multi-gang and combination cover's save even more time, using less screws to install and with our new tool-free options you just push the device cover in and the Christmas tree type pins provide a sturdy and strong fit. The translucent yellow, 63 mil PVC material allows for easy identification of device orientation and color along with solid strength and durability. These covers are **FULLY GUARANTEED** against device damage caused by STANDARD drywall installation and finishing and are completely router resistant. These covers are tough. Proven in use by nationally recognized companies.

- Covers meet UL Standard 514C—Flame Rated and Non Conductive
- Easy device identification
- Steel-like performance
- Multi-gang and combination applications
- 100% Guaranteed against device damage
- Router resistant
