

# SMARTGUARD™ SPIRAL DUCT CAPS

Put A Cap On It!

# SmartGuard™ Products

## HVAC SPIRAL DUCT CAPS

These tough Spiral Duct Caps are not only recyclable and reusable, they provide great holding power during transportation. Made from translucent yellow PVC for easy visibility and designed sturdy for multiple uses per cap. They also provide secure protection at the jobsite staging areas, won't tear or come loose like wraps and tape, and eliminates time needed to monitor sticky wrapped pipe and fittings daily for tears and proper adhesion. Overall, these caps are a huge labor savor from the first install at the pipe end through the removal at assembly and trim. Since there are no adhesive on our caps, any time needed cleaning off the pipes from left over tape and wrap glue are now a thing of the past.

### Good for Multiple Applications

SmartGuard™ Spiral Duct Caps are a major labor and time savor— caps install in seconds and are easily set to new location.

- Duct pipes can now be stood on end to save space without damage to yellow caps.
- From shipment to final trim, ducting is protected from dust, debris and moisture.
- Helps meet LEED jobsite requirements.
- Available in sizes 4" - 20" in diameter.
- Made in the USA
